Title of Change: JRE 1.3.1 Needed for BMGT on p2acs06

Sun Installation:

There are two major steps for installation.
· Installation media preparation
· COTS installation
Stage the Sun JRE tar file:
1.) Obtain the package distributed to your site by CM.
2.) Extract the ECSj2re-1.3.1-01-local.gz package into a central, NFS accessible directory. This designated staging directory is denoted in the below instructions by <stagingdir>.
cd <stagingdir> ¿
        # gunzip ECSj2re-1.3.1-01-local.gz ¿
After the package has been uncompressed in the staging directory, it is now, time to install the package. This will be accomplished by running a (pkgadd) command using a –d option.
        # pkgadd –d ECSj2re-13.1-01-local ¿
When prompted to select package, use the default (all) to process all package (s).
        # (all) ¿
The next step will prompt to create the directory /usr/ecs/OPS/COTS/jre, select yes to create this directory.
        # (yes) ¿
 The install will continue until the confirmation 'Installation of <ECSj2re> was successful. The JRE installation is now complete.
